Top Employer List Methodology

Business data was compiled from three separate sources, each providing business name, address, employment count, and industry classification. These datasets were consolidated into a single spreadsheet and sorted by zip code for analysis:

Data Sources

- Demandbase is an account-based marketing, sales intelligence, and data platform used for identifying and gathering information on businesses, contacts, and prospects.

- CoStar is a comprehensive source of commercial real estate intelligence, offering an inventory of over 6.4 million commercial properties spanning 135 billion square feet of space in 390 markets across the US.

- Esri ArcGIS Business Analyst combines proprietary statistical models covering demographic, business, and spending data with map-based analytics to offer insights on market opportunities for industries, businesses, and sites.

Standard Industry Classification (SIC Codes)

SIC Codes are two- to six-digit codes assigned by the U.S. government to classify a company's business activity. The index below contains some of the codes that indicate major industry classifications; each extra digit further defines the business. For additional information, go to: osha.gov/data/sic-manual.
